

The department of Computer Science in our college offers undergraduate program leading to degree such as Bachelor of Science (BSc) in Computer Science( General and 3-Year MDC). These programs often cover a broad range of topics, including:

**Programming and Software Development:** Courses in programming languages, software engineering, and software development methodologies teach students how to design, implement, test, and maintain software systems.

**Algorithms and Data Structures:** These courses focus on fundamental algorithms and data structures used to solve computational problems efficiently. Topics may include sorting algorithms, graph algorithms, dynamic programming, and data structure design.

**Computer Architecture and Systems:** Students learn about the design and organization of computer systems, including topics such as computer architecture, operating systems, computer networks, and distributed systems.
